## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1621

Claims 1-50, 52-60 and 68-74 are pending in this application. The previous rejections of the claims under 35 USC 102(b) as anticipated by Wu et al. (Chem. Abst. 123:285437) and Wagnon et al., US 5,338,755, are withdrawn. The search has been extended to include compounds wherein a phenyl moiety is substituted directly with sulfur, nitro or a phenyl moiety.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6-9, 14-18, 20-50, 52-60, 70-72 and 74 rejected under 35 U.S.C. 102(e) as being anticipated by Fleming et al. Fleming et al. disclose anticipating compounds such as the compound at the bottom of the right hand column of page 13.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 1621

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-50, 52-60 and 68-74 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fleming et al. disclose compounds of formula I as CCR9 inhibitors useful in treating inflammatory diseases. Fleming et al. disclose anticipating compounds such as the compound at the bottom right hand column of page 13. Fleming et al. disclose their compounds may be aryl moieties may be substituted by groups overlapping applicants (s. bridging paragraphs, pages 1 and 2 and pages 4 and 5). The instant invention differs from the teaching of Fleming et al. in that not all compounds are exemplified. It would have been prima facie obvious at the time the invention was made to one of ordinary skill in the art to make further generically disclosed compounds, especially in view of anticipating compounds already made, and to expect to make compounds useful in treating inflammatory diseases.

No claim is allowed.
